EDUCATION

Middlesex College, Edison NJ — *AAS Degree*

SEP 2019 - DEC 2022

PROJECTS

Note-ify— *Online notes app, users can create accounts, store notes and view them from anywhere using their sign on credentials.*

This application was made using HTML, CSS, and Javascript on the React framework. I used Google's Firebase API in order to store and retrieve data as well as for authenticating user login information.

Weather App— *A weather app made using the Openweathermap API*

This application was made using HTML, CSS, and Javascript on the React framework. I used Openweathermap's API in order to find,retrieve and display weather data for a given city.

TicTacToe— *A tictactoe game made using Javascript and React*

This application was made using HTML, CSS, and Javascript on the React framework. The application uses Javascript to read where the users click to place either an X or an O depending on who's turn it is, then it checks to see if there are any winning patterns and displays a modal showing who won.

Portfolio— *A portfolio website designed to showcase my projects*

This application was made using HTML, CSS, and Javascript and bootstrap on the React framework. This website contains my projects, resume, about and contact information.

LANGUAGES/FRAMEWORK

JavaScript

PHP

SQL

ReactJS

Skills

Relational Databases

API Implementation

Front End Website Design

Object Oriented Programming

UI/UX design

Microsoft 365

G Suite

BootStrap

About

I have learned to use React, as well as Javascript and acquired the ability to implement API's in order to build some great projects and further my learning journey beyond what was taught in my college courses.
