EDUCATION

Middlesex College, Edison NJ — *AAS Degree in Computer and Information Systems*

SEP 2019 - DEC 2022

PROJECTS

Note-ify

- Online notes app, users can create accounts, store notes and view them from anywhere using their sign on credentials.
- This application was made using HTML, CSS, and Javascript on the React framework.
- Google's Firebase API was utilized in order to store and retrieve data as well as for authenticating user login information.

Weather App

- A weather app made using the Openweathermap's API in order to find,retrieve and display weather data for a given city.
- This application was made using HTML, CSS, and Javascript on the React framework.

Dealership

- This website was made using HTML, CSS, and Javascript on the React framework.
- A conceptual dealership website made using javascript, react, as well as a backend using firebase to pull data about each car showcased on the site. This website organizes the cars and allows the user to rearrange them to their liking using filters such as: price, fuel, year and mileage.

Portfolio

- mohamedrafeek.netlify.app
- A portfolio website designed to showcase my projects
- This application was made using HTML, CSS, and Javascript and bootstrap on the React framework.
- This website contains my projects, resume, about and contact information.
